TENURE-TRACK FACULTY POSITIONS
DIVISION OF BIOMEDICAL INFORMATICS,
DEPARTMENT OF PREVENTIVE MEDICINE,
NORTHWESTERN UNIVERSITY – FEINBERG SCHOOL OF MEDICINE

The Division of Biomedical Informatics, Department of Preventive Medicine, of Northwestern University’s Feinberg School of Medicine seeks highly motivated individuals who want to join a growing, dynamic team and have a real impact on the future of health care and biomedical research. Tenure-line positions are available at the Assistant and Associate levels. The organizational culture is highly collaborative, emphasizing multidisciplinary approaches rather than silos. The Biomedical Informaticians in these tenure-track positions will conduct high quality original research. These scientists are expected to: compete successfully for extramural funding; publish research results in leading peer-reviewed sources; collaborate and consult with other investigators at Northwestern; develop multi-institutional collaborations; teach graduate-level Biomedical Informatics courses; and participate in Departmental and national scientific duties, such as committee membership, presentations at professional conferences, and peer review of research proposals and publications.

Successful candidates will have an MD, PhD or equivalent, with training in Biomedical Informatics combined with a desire to translate discoveries into improvements in informatics research and clinical systems. An ability to work in multidisciplinary teams as well as independently is essential. An ability to plan, staff, and execute informatics research projects is required, as demonstrated by an appropriate record of peer-reviewed publications. A record of extramural funding, peer review experience and national professional activity is expected for senior candidates. Potential research foci might include: the design and evaluation of novel Clinical or Clinical Research Systems; Ontology development and management; Clinical Research Workflow; Global Health Informatics; Data-mining of biomedical data; Translational Bioinformatics; Informatics Methodology development; or, Outcomes Research on the impact of HIT. These full-time positions are based in the Feinberg School of Medicine at the Chicago lakefront campus. Primary academic appointment would be in the Department of Preventive Medicine, Division of Biomedical Informatics. (Upon formation of a Department of Biomedical Informatics, the position would transfer to the new department.) Salary is commensurate with experience and duties. The start date is flexible.

Northwestern University is an Affirmative Action/Equal Opportunity Employer. Hiring is contingent on eligibility to work in the United States. Women and Minorities are encouraged to apply.

To apply, please submit a Curriculum Vitae, a list of 4-6 references, and a letter of interest including a summary of research interests and future plans. Materials should be sent electronically to Joshua Lamb (j-lamb@northwestern.edu).
